# Input and output

Let's define "input" as "loads from outside our process" and "output" as "stores visible outside our process".

This covers, then:

FIXME about 20 more pages...

“Anybody can build a fast CPU. The trick is to build a fast system.”  
—Seymour Cray

“Do not go gentle into that good night,  
Old age should burn and rave at close of day;  
Rage, rage against the dying of the light.”  
—Dylan Thomas (1951)
